

Emergency Communications

How Can You Call for Help When No Phone Works?

When all else fails, Ham radio gets through.

Disasters prove how important communication is. Ham radio will become the only way to communicate.

Free Ham Radio Licensing Classes

A two-Saturday class series will be on November 2nd and 9th 2019. Attend both days to help you review the questions so you can pass the FCC licensing test and become an Amateur Radio Operator (Ham).

The best study guide is by Gordon West and is \$25. This class is a review of this book. Those that study the book first will get the most out of this class.

There will also be “self-study” groups for the General and Extra exam questions.

Class Location: 11150 Collett Ave, Riverside. Classes start at 8:00 am and end around 1:00 pm.

Please see your Ward Preparedness Leader for details or contact Keith Harrington to sign-up, 951 515 3904

Remember,
when all other communications fail,
**HAM RADIO
GETS THROUGH.**
